DENTAL  
IMPLANTS  
DENTAL

YOUR DEMAND IS OUR DRIVE

The company was founded in 1954 by dental technician Klaus Ihde in Berlin. In the 1960s the company moved to Bavaria. At the end of the 1980s the company was divided into Ihde Dental GmbH (Germany) and Dr. Ihde Dental AG (Switzerland).

Later the Ihde Dental Group was founded with several closely related companies such as Simpladent GmbH, oneway Suisse GmbH and onewaybiomed GmbH. The Ihde Dental Group has now offices at seven locations in Europe and is represented in over 45 countries worldwide. The company group is one of the most innovative implant companies in the world, measured in terms of the new developments and the patents granted or filed in recent years.

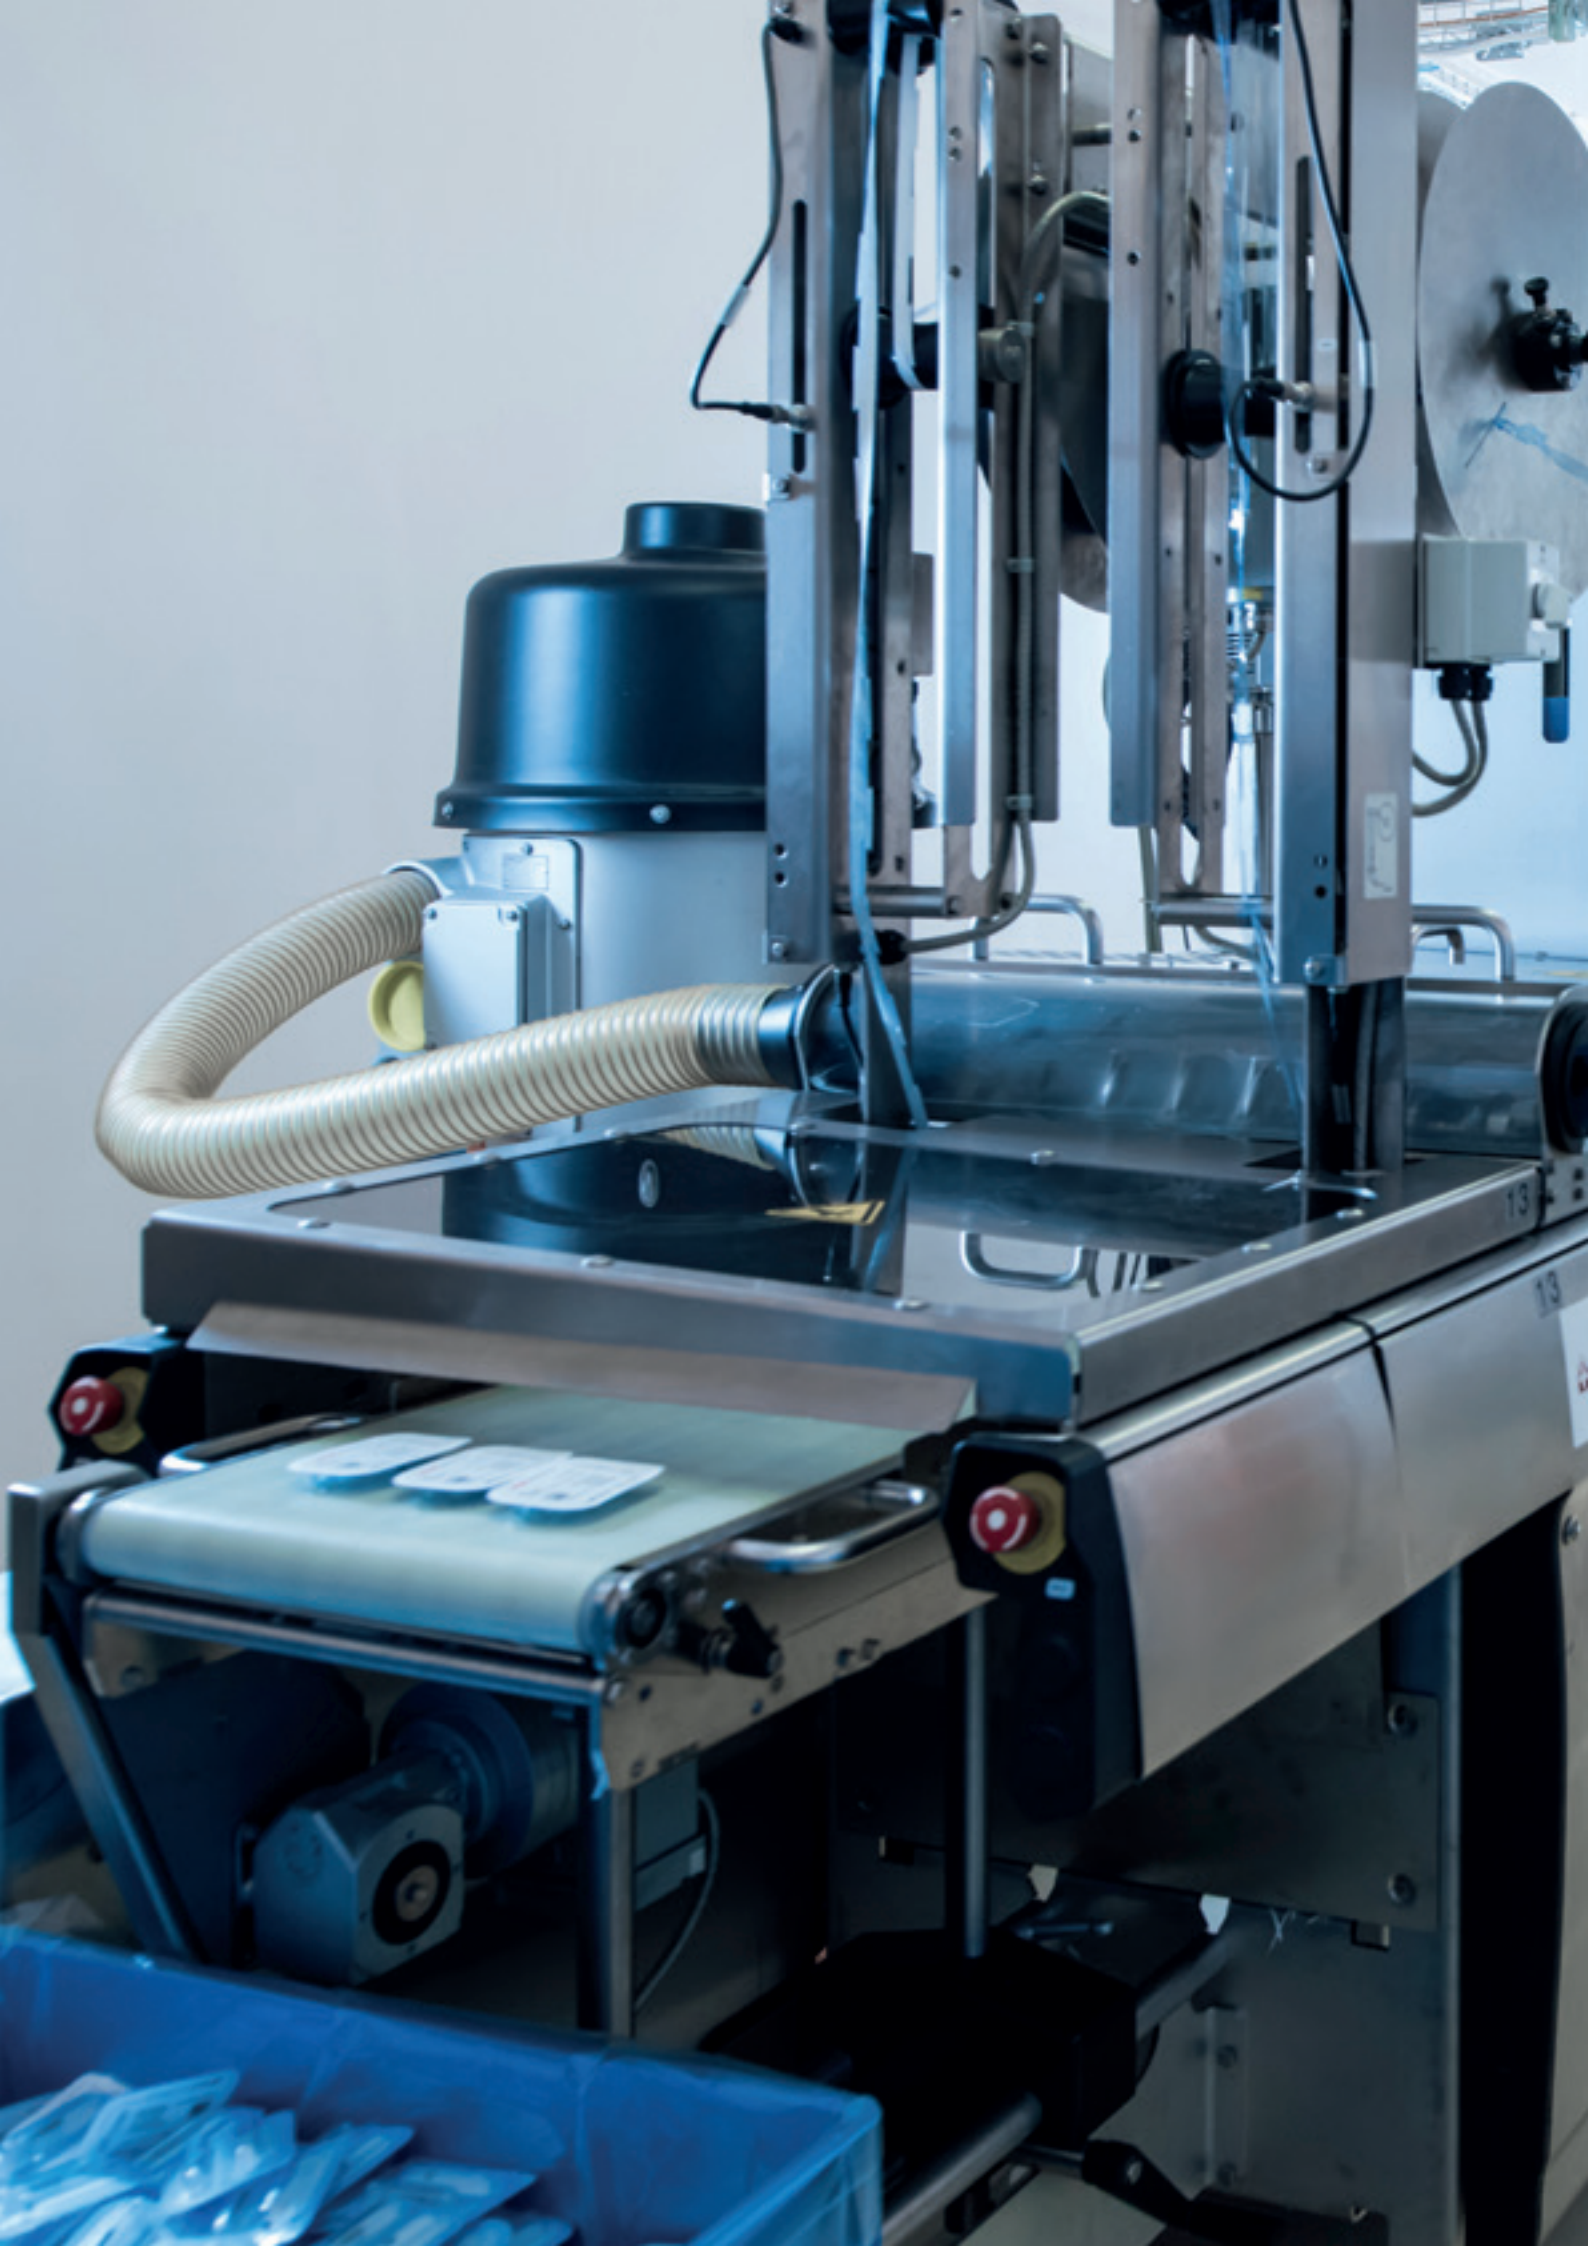

# OUR COMPETENCIES - YOUR SOLUTION

**Understand || Develop || Produce || Support**

We have been a reliable partner for a wide range of implant systems and consumables for more than 60 years. We are consistently focused on delivering the best solution for our customers. We have been setting pioneering standards in dental implantology. For customers who want to fully develop their potential. Worldwide. We supply dentists and dental technicians with precisely coordinated materials and systems, which are simple and safe to use. We always pay attention to high quality and an excellent price- / performance-ratio, so that you can guarantee your patients optimal price efficiency with high quality.

Dr. Stefan Ihde

The core business of Ihde Dental today includes the development, procurement, production and distribution of dental implants. We use a large number of suppliers in the field of consumables, but we have been manufacturing implants for many years in our own company. Thanks to modern manufacturing technology and a state-of-the-art, partly self-developed machine park, the products can be produced quickly, precisely and at an affordable price.

Thanks to many years of **experience**, we **understand** customer requirements exactly.

Our customers are at home all over the world. This long-term experience and the profound knowledge of the industry are our advantage for our customers. Thanks to our great know-how, we understand every wish of our customers and implement it as quickly as possible. In addition, the education of our customers is a major focus of our activities.

Since its founding, the company has been committed to innovative ideas and advanced technology, premium quality, very good price rates, optimal patient- and user-friendliness and long life. Our products combine state-of-the-art research and direct feedback from our users.

IHDE DENTAL

We have been **producing** in Gommiswald for 30 years.

Ihde Dental stands for Swiss quality. Following this principle has made us one of the industries leaders. The result are economical and long lasting implants for everyone. Our dental implants are used in the highly infected oral cavity. To avoid infections, we rely on smooth or highly precise roughened surfaces with an ultra-precise structure. We do not use chemicals to structure the endosseous implant surfaces.

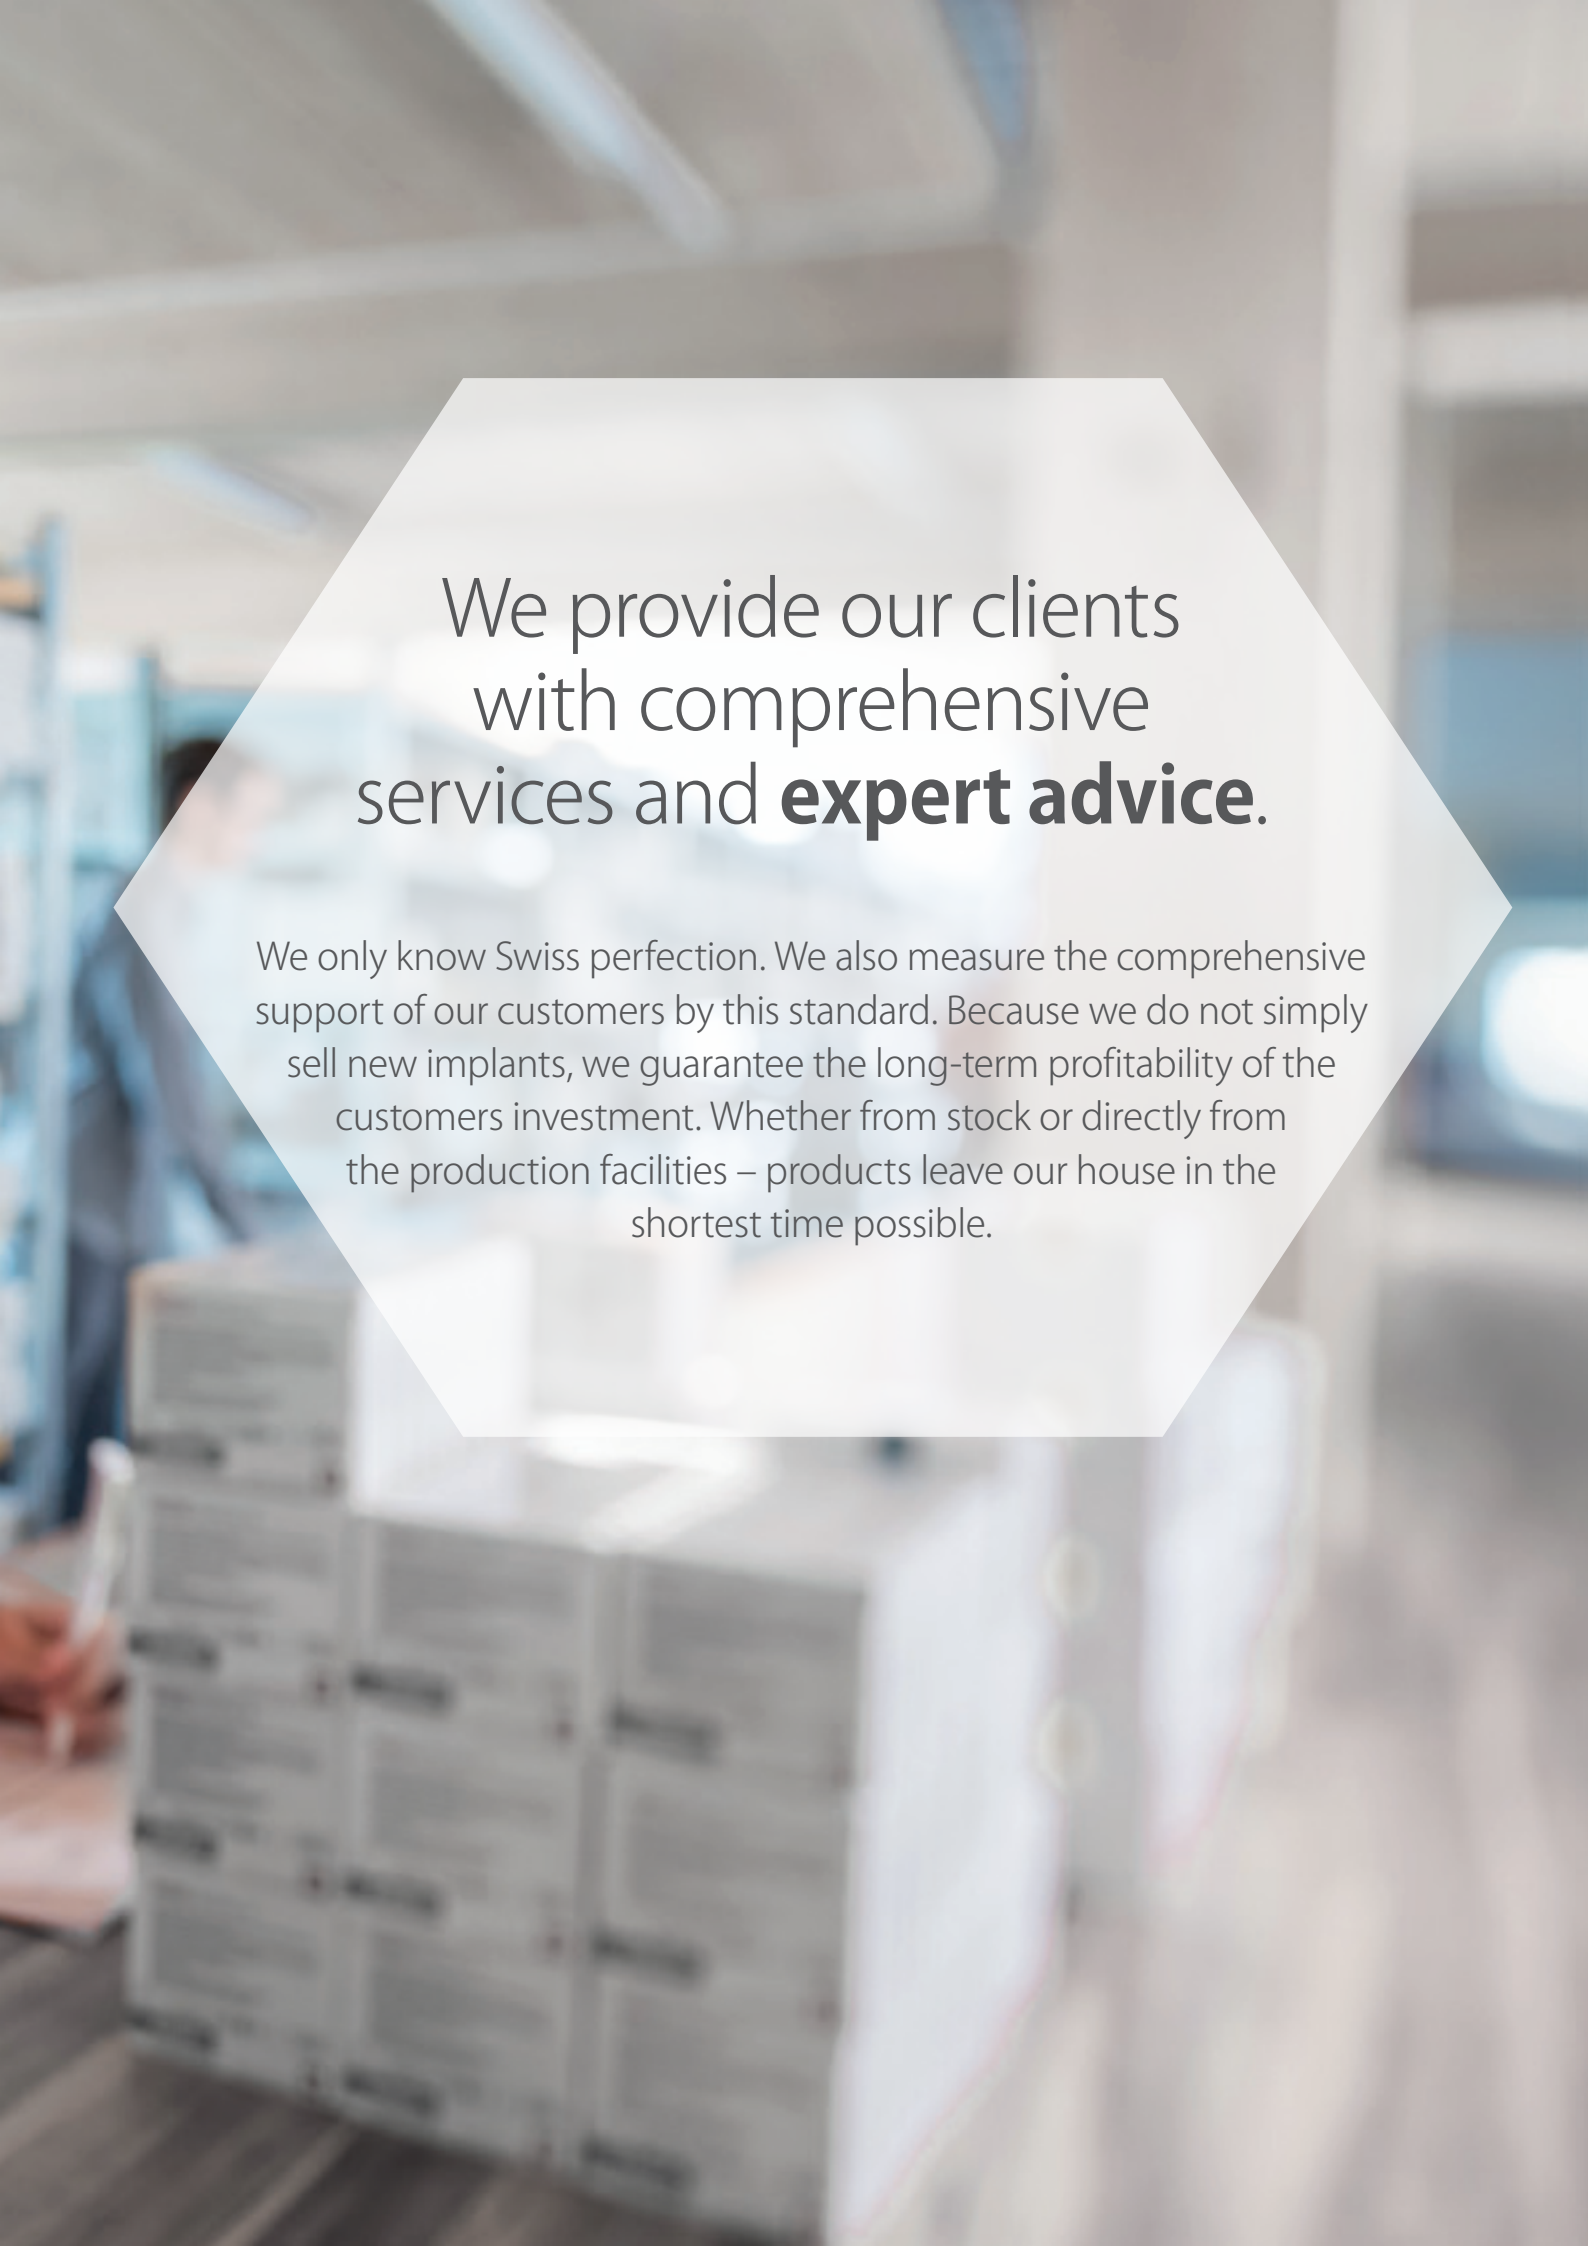

A scenic view of a Swiss village with a large white hexagonal text overlay. The background shows a lush green hillside with a small house, a dense forest of evergreen trees, and a cluster of houses with red-tiled roofs. In the foreground, a modern, light grey building with many windows is visible, along with a parking lot containing several cars. The text is centered within the hexagon.

Customer  
orientation means to  
us: **We are always there  
for you.**

Ihde Dental develops and manufactures for customers all over the world. We provide training, retraining and consulting for users. We advise our customers comprehensively and professionally. And upon request, we will gladly come to your practice.

We provide our clients  
with comprehensive  
services and **expert advice.**

We only know Swiss perfection. We also measure the comprehensive support of our customers by this standard. Because we do not simply sell new implants, we guarantee the long-term profitability of the customers investment. Whether from stock or directly from the production facilities – products leave our house in the shortest time possible.
